Who Should Attend
This symposium is designed for primary care physicians, gastroenterologists, surgical, medical and radiation oncologists, endocrinologists, interventional and diagnostic radiologists, pathologists, genetic specialists, hematology/oncology fellows, oncology nurses, and other healthcare professionals involved in the treatment of patients with gastrointestinal cancers.

Overview:
This symposium is designed to give health care providers information on personalized therapy, current clinical management strategies for neuroendocrine tumors, and new approaches for translational and clinical research.

Objectives:
At the completion of this conference, participants should be able to:

» Summarize the latest information in the management of neuroendocrine tumors
» Describe adjuvant and neoadjuvant treatment options for gastrointestinal cancer
» Identify prognostic markers for future diagnostic and treatment options for gastrointestinal cancer
» Discuss genomic testing for personalized therapies that alters patients’ treatment and prognosis
» Assess the current status of translational research in cancer genetics for treatment and prognosis
» Identify targeted interventions, such as protons and personalized therapy for the treatment of gastrointestinal cancer
