MEDICAL KNOWLEDGE and SKILLS

16. Has the student achieved minimal competency for medical knowledge and skills?
   X Yes

17. If you answered YES, BUT WITH CONCERNS or NO the question listed above, comments MUST be provided.

OVERALL COMMENTS (50 words is a recommended minimum)

18. Please describe the student's strengths.

   A was an absolute pleasure to have rotate with us on the trauma service at PENN. She is very bright and energetic and has an infectious smile. She always seemed eager to learn and do new things regarding the care of the injured patient. During her rotation she consistently performed at the level of a junior resident both in the trauma bay as well as in the OR. She obviously read extensively and was always well prepared for operative cases and rounds. A has all the tools necessary to be an outstanding physician and definitely an outstanding surgeon.

19. Please describe areas in which improvement is needed.

   Oral patient presentations could be more concise and efficient, limiting information to pertinent positive and negatives and eliminating non essential details.
